## EM364: WEBINAR AIDB - “Above and Beyond the Stroke: the Bobath Concept Applied to Different Neurological Conditions”

GIUSEPPE FRAZZITTA

MD Neurologist

NIR GILADI

GIANCARLO COMI

*AIDB (Associazione Italiana Docenti Bobath ) is happy to announce the webinar: “Above and Beyond the Stroke: the Bobath Concept Applied to Different Neurological Conditions”*

*The Bobath Concept is an inclusive and individualized approach aimed at the evaluation and treatment of people with movement disorders resulting from lesions of the central nervous system.*

*This approach to the rehabilitation of adults with acquired neurological lesion originates from the work of Karel and Berta Bobath and has evolved over the last 70 years.*

*The rationale for its application is rooted in current neuroscientific knowledge relating to motor control, motor learning, neural and muscular plasticity and biomechanics.*

*Used in the past especially for the rehabilitation of stroke patients, it is now recognized as a valid tool for supporting clinical reasoning in structuring the therapeutic project*

*in many other neurological conditions. The aim of this webinar is, in fact, to promote discussion between experts to implement skills in the clinical and rehabilitation framework of patients suffering from Multiple Sclerosis and Parkinson's Disease*

100 Seats

€122.00
